

1. **Question 3**

1. I download my Dataset from NYC Taxi Limousine Commission, <https://www1.nyc.gov/site/tlc/about/aggregated-reports.page>.
2. I transform the date type so that I can draw a graph.
3. I use ggplot to draw three pictures for Trips.Per.Day, Unique.Drivers, and Unique.Vehicles by using `geom_line()`, `geom_point()`, and `geom_jitter()` respectively.

2. **Question 5**

The following pictures show the time trend of Trips.Per.Day, Unique.Drivers, and Unique.Vehicles for Black car, High Volume, Livery, Lux Limo, Green taxi and Yellow taxi. Now I am still struggling with showing date on the pictures by using "scales".
